

✦ *Music Review Club* ✦

Shawn, Michael, Kerrius, Lydia

## *Elevator Pitch*

We are aspiring developers, who had an idea to create an music club so our family and friends can see our thoughts on an certain song, album or album, as well as posting their own thoughts/comments.

# Concept

- Essentially this app is an music blog that an user can post an song, album or artist leaving their thoughts on the topic.
- Motivation for development? Create a community of music lovers that shares new songs.
- User story
  - **AS A** Music Review Club user
  - **I WANT** to login to this application to be able to view the feed and add music reviews
  - **SO THAT** other users are able to add comments and see my reviews.

# *Future Development*

- Likes/Dislikes
- Adding media rather than youtube URLs
- Hiding posts/users
- Filter by Genre
- Search songs/artists/users
- Sorting feature
- Deleting posts/updating posts
- Friend list- follow users
- Dash to see your own posts/playlist

*Demo*

# Processes

## Technologies Used...

- Node.js
- npm Sequelize
- npm dotenv
- npm mysql2
- npm express
- JavaScript
- Bootstrap
- CSS
- Handlebars
- Bcrypt
- Heroku
- AOS
- HTML

## Tasks and Roles...

FrontEnd Devs: Lydia & Kerrius

- Models
- Handlebars
- CSS/Bootstrap

BackEnd Devs: Shawn & Michael

- Routes
- JS
- Seeds

Group: troubleshooting & connection

# *Challenges & Successes*

## **Challenges...**

- Handlebars
- Merging/branches
- “Putting the pieces together”
- Logging in/out
- Hashing the passwords
- Deploying to heroku
- Troubleshooting syntax errors

## **Successes...**

- Communication
- Gaining more experience  
troubleshooting & refactoring  
code
- CSS animation
- Emoji keyboard input
- AOS (animation for posts on  
scroll)

# Brand Guide

## Colors:

#4dd0e1

#000000

#212121

## Fonts:

Accent: *Lobster* (google font)

Body: Arial

## < Wire Frame:

Designed for desktop but is mobile responsive.
